

HARSHAVARDHAN REDDY VARICUTI

Bryan, TX 77801 | +1 (469) 588-2227 | harshavaricuti@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)
F-1 Student - Eligible for CPT internship authorization and OPT upon graduation | Available Summer 2027 (mid-May)

PROFESSIONAL SUMMARY

M.S. Data Science candidate at Texas A&M University with 2+ years of industry experience building, scheduling, testing, and supporting production ETL/ELT pipelines using Python, SQL, PySpark, Azure Databricks, and Databricks Workflows. Experienced in enterprise Hadoop-to-Databricks migration, data-quality validation, CI/CD, and production issue resolution. Databricks Certified Data Engineer Associate seeking a Summer 2027 Data Engineering Internship.

TECHNICAL SKILLS

Data Engineering: ETL/ELT, Azure Databricks, Databricks Workflows & Jobs, Apache Spark (PySpark), Apache Airflow, dbt Core, Data Integration, CI/CD, Data Quality Testing, SQL Performance Optimization

Cloud & Platforms: Microsoft Azure, AWS S3, AWS Glue, Snowflake, PostgreSQL, Supabase, Delta Lake, Hadoop, Hive, Kafka

Architecture & Governance: Data Modeling, Dimensional Modeling, Star Schema, Medallion Architecture, Data Validation, Metadata Management, Row-Level Security, Audit Logging

Languages & Tools: Python (Pandas, NumPy), SQL (PostgreSQL, MySQL, Databricks SQL, Snowflake SQL), Git, GitHub Actions, Docker, Linux/Unix, Jira, Bitbucket, Astronomer, Drizzle ORM, Power BI, Tableau

CERTIFICATIONS

Databricks Certified Data Engineer Associate | AWS Certified Cloud Practitioner

PROFESSIONAL EXPERIENCE

Texas A&M AgriLife Research - Soil Water & Forage Testing Laboratory | College Station, TX

Student Assistant | May 2026–Present

- Built a PostgreSQL/Supabase data platform to replace paper-based laboratory sample intake and tracking, improving structured-data accessibility for laboratory technicians and external clients.
- Translate operational workflows into data requirements, validation rules, secure submission processes, and analytics-ready datasets across multiple laboratory sample types.
- Design and maintain ingestion and synchronization workflows with transactional error handling, CI/CD, and data-quality controls; apply relational modeling, Row-Level Security, audit logging, and structured metadata practices.

Cognizant Technology Solutions | Bengaluru, India

Programmer Analyst, Data Engineering | Jun 2024–Aug 2025

Programmer Analyst Trainee, Data Engineering | Jun 2023–Jun 2024

- Engineered PySpark and SQL ETL pipelines for a Hadoop-to-Azure Databricks migration of 2,000+ enterprise tables; owned workflows covering approximately 50% of the scope.
- Scheduled, monitored, and troubleshooted Databricks Workflows and Jobs supporting migration of approximately 1,000 enterprise tables, ensuring reliable production processing.
- Unit-tested and validated 2,000+ SQL scripts, supporting reliable, zero-defect deployments and stronger data quality.
- Resolved 15+ critical UAT and production data-quality issues with cross-functional stakeholders, reducing production incidents by 30%.
- Optimized shared Databricks compute through cluster pooling, reducing environment setup overhead by 40%.

PROJECTS

End-to-End Stock Market ELT Pipeline | [GitHub](#)

Technologies: Python, AWS S3, Snowflake, Apache Airflow, Docker, dbt Core, Power BI, SQL

- Built a cloud-based ELT pipeline that extracts financial data through a REST API, stages it in AWS S3, and loads it into Snowflake for scalable analysis.
- Orchestrated scheduled daily workflows with Dockerized Apache Airflow and dependency-managed DAGs; built dbt star-schema transformations and automated schema tests.

SWFTL Lab Data Platform - Client Portal and LabTrack | [Private Repository](#)

Technologies: PostgreSQL, Supabase, SQL, TypeScript, Drizzle ORM, GitHub Actions, CI/CD

- Designed a normalized PostgreSQL model with foreign keys, indexes, RLS, audit logging, and JSONB metadata; built validated intake-to-record ingestion pipelines.
- Developed idempotent ETL and synchronization jobs for online and physical submissions, including entity resolution and data backfills; managed version-controlled SQL migrations and GitHub Actions CI/CD.

PROFESSIONAL TRAINING

Cognizant Certified Skill Development Program - Data Integration | Jan 2023–Jun 2023

Training: Python, SQL, big-data concepts, ETL, query optimization, and data integration.

EDUCATION

Texas A&M University | M.S., Data Science | GPA: 3.86 | Aug 2025–May 2027

ECEN Graduate Merit Scholarship recipient; awarded stipend and in-state tuition waiver. Coursework: Database & Computational Tools, Data Warehousing, Data Mining, Distributed Systems & Cloud Computing.

KLE Technological University | B.E., Electronics & Communication Engineering | GPA: 8.77 | Aug 2018–Jun 2022
